

Noah's 66th Annual Meeting

May 7-11, 2025 | QUEBEC CITY, QUEBEC

EDUCATIONAL GRANT OPPORTUNITIES

The Noah Worcester Dermatological Society will hold its Annual Meeting on May 7-11, 2025 in Quebec City, Quebec. The Noah Annual Meeting is one of the premier dermatology meetings in the United States, and the Society members comprise the top names in dermatology. In addition to having top-notch continuing medical education, the meeting promotes opportunities for one-on-one interactions among physicians and industry leaders.

The 2025 continuing medical education program will include disease-state sessions to provide members and benefactors with the most up-to-date information, therapies and treatments for various dermatological conditions. Potential topics considered for the 2025 CME program include:

- Chronic Spontaneous Urticaria
- Hidradenitis Suppurativa
- Atopic Dermatitis
- Psoriasis
- Alopecia Areata
- Melasma and treatment of skin of color pigmentation

The Noah Annual meeting typically provides up to 14 hours of CME throughout a three-day program, and we intend to host one disease-state session each day. Funded with educational grants, the sessions will provide attendees the latest and greatest for therapies and treatments in dermatology and provide your company an opportunity to be acknowledged as the company providing the grant for the program.

Funding a medical education grant is another opportunity to support the Society. Please consider whether providing an educational grant for one of these sessions would align with your mission!

LET'S CONNECT!

If these topics are of interest to you, we'd love to connect to learn more about your educational grant program and application process.
